

Are you a smart and talented Microsoft SQL Server Database Administrator who gets things done? Do you want to be a key player in a fun and exciting team working on innovative projects with cutting edge technology? Do you get excited about tackling large and challenging data problems? Do you want to join a company that has experienced phenomenal growth and market share gains? If so, Mindshare is the place for you!

Mindshare Technologies is one of Utah's fastest growing software services companies and recipient of many awards over the past few years including being named as one of Utah's best companies to work for in 2011 (<http://www.mshare.net/news/awards.html>), and we're looking for DBA's to help us evolve our next generation business intelligence tool for real-time enterprise feedback management.

**JOB TITLE: SQL Server Database Administrator**

**GREAT STUFF ABOUT THIS JOB:**

- Work with multiple large scale databases on SQL Server and Netezza Warehousing appliance
- Wrestle large problems (big data, complex queries, high availability, clustering)
- Secure future (fast growing company that is financially secure)
- Help shape team culture (your thoughts and recommendations are welcomed and encouraged)
- Casual environment (shorts and flip flops or jacket and tie, whatever you like)

**QUALIFICATIONS:**

- Database Administration: Experienced in administering multiple large scale SQL Sever databases
- T-SQL: Able to write and understand complex SQL queries
- Query Optimization: Skilled at analyzing complex SQL queries and finding ways to optimize performance and resource utilization
- ETL/ELT: Move and transform data between databases using replication, SSIS, DBMoto, etc.
- Schema Architecture: Deep understanding of schema design and architecture including normalization techniques
- Partitioning: Know when and how to appropriately partition databases for performance and maintainability
- Stored Procedures and Functions: Write, maintain and optimize

**EDUCATION AND/OR EXPERIENCE:**

- Education: Degree in Computer Science or related or equivalent work experience
- Experience: 2-4+ years experience in SQL Server database administration
